

DEPARTMENT 13 — VEGETABLES

1. In selecting vegetables for exhibition, choose such specimens that would bring the highest market price. Do not select the largest, select medium-size specimens. If at all possible, do not mix varieties.
2. The following factors are generally used by an expert vegetable judge:
 - a. Trueness to variety type. If at all possible, pick the specimens from one variety.
 - b. Uniformity in shape, size, and color.
 - c. Be sure to pick out a perfect specimen, then select the others as similar to it as possible. Never mix specimens of different maturity..
 - d. Protect from dirt, disease, infection and mechanical damage. Select specimens that are perfect and show no blemishes of any kind.
 - e. Condition and maturity. Be sure that exhibits are of high quality.
 - f. Tomatoes should have stems removed. Carrots, beets, etc. should have tops (leaves) removed from vegetables leaving about 2-inch stems. Dry Shelled beans should be displayed in pint size jars.
3. Read premium material, carefully following all rules and regulations. If an entry calls for five specimens, be sure to exhibit that number; do not enter four or six. In any instance, exhibits will be disqualified if the correct number of specimens is not entered.
4. Due to limited space, only one entry per class per exhibitor will be accepted.
5. Exhibits will be disposed of by the fair at 10 p.m. Saturday, Aug. 26, unless otherwise specified by the exhibitor at the time of entry.
